

THE GROVE SPA

& BOUTIQUE

Gold Infusion Post-Treatment

Follow this care plan closely in order to see the best results.

On the day of your treatment:

- A sunburn-like effect immediately post-treatment is normal. The treated area may appear pink in color but will resolve in 1-2 hours. The skin may feel tight, dry, swollen, and sensitive to the touch.
- Do not wash your face for the first 6 hours. Wash the treated area gently with a gentle cleanser and you may apply moisturizer (which does not contain "anti-aging" ingredients) thereafter.
- You may resume your normal daily skin routine the day after treatment.
- Sun exposure must be avoided for at least 24 hours after your treatment
- No exercise that causes sweating, Jacuzzi, sauna, or steam baths if any skin irritation exists.
- It is recommended that makeup not be applied for at least 6 hours post procedure.
- Do not pick or scratch treated skin.

1-2 Weeks After:

- Do not use exfoliating medications, chemicals, or products on the treated areas for at least 2 weeks.
- No area treated should receive any type of chemical peel for 2 weeks after treatment.

Best results are obtained in a series of 3-6 treatments.
